## DETAILED ACTION

### *Drawings*

1. The drawings are objected to because Figure 3 is not consistent with the claimed invention having the attachment above the "lip portions". A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Due to the confusing Figure 3 it is not clear what is defined by the term "lip portions", therefore one of ordinary skill in the art would not know how to make the invention where the inner member is connected to the outer tire "above" the lip portions.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

See paragraph 3 above concerning the "lip portions".

Art Unit 1733

*Conclusion*

6. Due to the 112 problems noted above, no prior art rejections have been made at this time; however, it appears that the definition of the lip portions is critical to whether or not the claims distinguish over the prior art cited in the parent application.
